**FOR IMMEDIATE RELEASE**

## **e5 Solutions Group Launches New Bank Administration for SAP Application**

CHICAGO – October 19, 2011 -- e5 Solutions Group today announced the launch of Overture5, a new SAP add-on that provides a comprehensive solution to help companies automate bank administration, providing information and analysis that support decisions and help establish a controlled routine to maintain accuracy over time.

The new toolset helps companies establish and maintain an accurate inventory of banks and bank branches, bank accounts, internal and external contacts, and authorized signers. Additionally, Overture5 will track policies, authorizations and limits; validate bank fee invoices and ensure fees are appropriate and in line with contractual agreements, raising exceptions for further investigation. Designed for deep, flexible integration with SAP's suite of treasury applications, Overture5 complements and extends SAP functionality, providing additional capabilities that help maximize the value of bank relationships.

“Overture5 was designed to go beyond traditional bank relationship management,” said Jaime Ryan, Managing Principal of e5 Solutions Group. “We’re providing our clients with a comprehensive solution to the lack of standards that often plagues companies when it comes to banking relationships. Combining our expertise with the critical need for a quality solution in this area provides SAP clients with an ongoing advantage in the form of expert tools they can use to continue to maximize their SAP Treasury solution investment.”

Overture5, the latest add-on from e5 Solutions Group to extend SAP Treasury functionality, encompasses a deep set of business tools including:

- Bank Structure Management
- Bank Account Maintenance
- Bank and Account Policies, Authorizations and Limits

-more-

- Bank Fee Analysis
- Bank Relationship Management

### **About e5 Solutions Group**

e5 Solutions Group ([www.e5solutions.com](http://www.e5solutions.com)) is the recognized leader in providing comprehensive solutions design and implementation services for all Treasury Applications from SAP, including Cash Management, In-House Cash, Bank Communication Management, and Treasury & Risk Management. With a seasoned team of consultants, e5 Solutions combines the flexibility and responsiveness required in today's business environment with the in-depth product knowledge of SAP Treasury to deliver bottom-line benefits in all the critical financial functions within an organization, including global cash management, in-house banking, payment factories, intercompany netting, liquidity management, debt & investments, foreign exchange hedging, interest rate hedging, market risk management and credit risk management.

e5 helps companies to maximize their return on financial investments, reduce risk, streamline critical finance operations, optimize cash management, and improve corporate performance.

With successful implementations at Fortune 500 companies worldwide, e5 and its Accelerator Plus™ programs help clients maximize their SAP investment by delivering comprehensive treasury and banking solutions across all critical financial functions. e5 is an SAP-certified Services and Software Development partner.
