

## **e5 Solutions Group's Bank Management Suite5™ Achieves SAP Certification as Powered by SAP NetWeaver®**

**Through interoperability with SAP® solutions, Bank Management Suite5 helps automate bank administration tasks, provides information and analysis to support decisions, and helps standardize processes across a multitude of banks.**

**PHILADELPHIA, Pa. – June 10, 2014** -- e5 Solutions Group, a leading provider of solution design, implementation services and add-on software for companies using treasury applications and the SAP® ERP Financials solution, today announced its Bank Management Suite5™ 1.0 has received certification from SAP as powered by the SAP NetWeaver® technology platform.

The solution integrates with SAP NetWeaver, providing functionalities to establish and maintain an accurate inventory of banks, branches, bank accounts, signers, authorizations and limits; manage bank fees by exception, rather than having to scour each entry on each invoice; and maximize the value of a company's bank relationships. Solutions that are powered by SAP NetWeaver can be more quickly and easily integrated into SAP® solution environments. Customers can benefit from improved interoperability with SAP applications and with the large ecosystem of solutions that run on SAP NetWeaver. Choosing an SAP-certified solution can also help reduce overall IT investment costs and risks.

"At e5, we are focused on delivering market-leading solutions to our clients that further leverages their investments in SAP solutions," said Jaime Ryan, co-founder and managing principal at e5 Solutions Group. "This new certification demonstrates our commitment to the standard of quality set by SAP and provides our customers with confidence that Bank Management Suite5 integrates with the SAP NetWeaver platform."

With a suite of functional capabilities that provide strategic insight into an organization's banking activities, the add-on solution from e5 Solutions Group automates the often labor-intensive and costly processes of managing and reporting on corporate bank accounts including the U.S. government compliance Report of Foreign Bank and Financial Accounts (FBAR). Bank Management Suite5 addresses all aspects of banking relationships that can be impacted by lack of standards and largely manual processes. The functional area includes Bank Structure Management, Bank Account Maintenance, Bank and Account Policies, Authorizations and Limits, Bank Fee Analysis and Bank Correspondence Management.

Serving its global customer base through a knowledgeable team of consultants focused exclusively on the treasury applications from SAP, e5 Solutions Group helps companies maximize their return on financial investments, reduce risk, streamline critical finance operations, optimize cash management and improve corporate performance. As a leader in its field with a commitment to delivering value-added functionality in support of SAP solutions, e5 Solutions Group has developed a suite of add-on programs – in addition to Bank Management Suite5 – which includes Cash Management Suite5, In-House Bank Suite5 and Market Data Suite5.

“All that we do at e5 is driven by the desire to provide our clients with the world-class solutions they have come to rely on,” Ryan added. “Our commitment to providing our clients with solutions that support SAP applications for treasury, risk and cash management functions coupled with our dedication to providing high-quality software helps ensure that we deliver on the first-class results we’re known for. We’re proud to have achieved this latest certification, which underscores that commitment.”
